

Interdisciplinary Maternal Perinatal Australasian Collaborative Trials Network
Improving health for mothers and babies through high quality, investigator-led, randomised trials

Friday 25th November 2016

**Upper East Dining Room at University House, Professors Road,
University of Melbourne**

Core Outcomes in Maternal & Perinatal Health Trials

Session One: Core Outcomes in Maternal & Perinatal Health Trials Chairperson: Stefan Kane	
9.00 - 09.05	Welcome - Katie Groom
09.05 - 09.20	The Core Outcomes in Women's and Newborn Health (CROWN) Initiative – Ben Mol
09.20 - 9.50	Progressing towards standard outcomes for perinatal clinical trials - Emily Shepherd
9.50 - 10.20	Using established datasets to inform clinical trial outcomes – the role of ANZNN - Kei Lui
10.20 - 10.40	Questions and Discussion
10.40 - 11.10	Key sources for perinatal trial outcomes: first report from the IMPACT Network data sources working group - Dorota Doherty , Jonathan Morris and Vicki Flenady
11.10 - 11.25	Morning Tea
Session Two: Current Trials and Concept Development Updates Chairperson: Katie Groom	
11.25 - 11.40	The Timing of Oxytocin Administration During Delayed Cord Clamping at Vaginal Birth in Term Infants; a randomised controlled trial - Fiona Stenning
11.40 – 11.50	IMPACT Network Concept Development Workshops – an Overview - Lucille Sebastian
11.50 - 12.20	Reducing adverse perinatal outcomes at term using third trimester ultrasound - Sailesh Kumar
12.20 - 12.50	The role of ultrasound indicated cerclage in a general population in improving perinatal outcome - Jonathan Morris
12.50 - 1.20	Current Multi-centre Trial Updates (2 mins, one slide). Brief progress reports from the major studies from IMPACT members. There will not be an opportunity for questions or discussion but this can be done with individual investigators during lunch break. Including: MBM, PAEAN, STRIDER NZAus, MAGENTA, CiPS, TARGET, Hi-Lo Study, APTS, LIFT, LEAP-1, PROVIDE, DIAMOND, hPOD.
1.20 – 2.00	Lunch
Session Three: Proposed Trials (afternoon tea refreshments will be available during this session) Chairperson: Dorota Doherty	
2.00 – 2.30	The Baby-Directed Umbilical Cord Clamping Randomized Controlled Trial: Utilizing the Placenta While Helping High Risk Newborns Breathe - Douglas Blank IMPACT Network Facilitator: Frank Bloomfield
2.30 – 3.15	Antenatal Corticosteroids for the prevention of respiratory distress syndrome in women with diabetes requiring insulin undergoing elective caesarean section at 36-39 weeks Joanne Said IMPACT Network Facilitator: Caroline Crowther
3.15 – 3.45	Melatonin for fetal growth restriction- Euan Wallace IMPACT Network Facilitator: Jonathan Morris
3.45 – 4.30	Clinical trial to examine whether the proton pump inhibitor esomeprazole can prevent preeclampsia: A proposal - Stephen Tong IMPACT Network Facilitator: Ben Mol
4.30	Meeting Close
